

# WAKEBOARD SELECTION MADE EASY...

Choosing the appropriate model & size of wakeboard, wakeskate or wakesurfer is determined on your skill level & weight. Decide your skill level (be honest!!) to see which models are available to you and then your weight (again, be honest!!) will determine which size is best. Once you've worked out which board/s are best for you, start checking which type of ride, price & look best suits you.

## Wakeboards
